

Mohamad Al kowatli

Location: Damascus

Phone: 0966150787

Email: mohammadalkowatli2@gmail.com

Nationality: Syrian.

Profile

I am a highly skilled Flutter Mobile App developer with experience in both Flutter Mobile App development and Flutter Web. I have successfully built numerous applications across various industries using Flutter and Flutter Web. My expertise extends to backend development using Laravel and MySQL database, where I have a clear vision and proficiency. I am also well-versed in RESTful API development.

Education

- ❖ Bachelor of Information Technology in International University for Science and Technology
Date Feb 2018 - July 2023.
- ❖ Mobile Application Development Using Flutter
Presented by: New Horizons Training Centres
Date November 2021

Experiences

- ❖ Human Resource Management System (HRMS) Project:
Jan 2023 – Aug 2023
 - Developed the front-end of a Human Resource Management System using Flutter, creating user-friendly interfaces for efficient HR processes.
 - Implemented the back-end functionalities using Laravel, ensuring seamless integration between the front-end and back-end components.
 - Created a dashboard specifically for HR personnel to efficiently manage employee data and perform administrative tasks.
 - Integrated features such as employee management, attendance tracking, leave management, and performance evaluation into the HRMS.
 - Cleaning architecture and writing clean code.

Skills

- ❖ I possess proficiency in using the **Bloc state management**. I can effectively manage application state and handle complex data flows using this architecture also, I am skilled in utilizing the **GetX state management**.
- ❖ Experienced in clean architecture principles for scalable, maintainable applications.
- ❖ Experienced developer with clean code practices and strong coding standards.
- ❖ Proficient in developing web applications using the Laravel framework. Strong understanding of Laravel's architecture, routing, migrations, and ORM.
- ❖ Experienced in designing and consuming RESTful APIs. Knowledge of API authentication methods like OAuth or JWT.
- ❖ Proficient in using Git for version control and collaboration with other developers. Familiarity with Git workflows like GitHub Flow.
- ❖ Solid understanding of database management systems, particularly MySQL. Proficient in writing complex SQL queries, optimizing database performance, and designing database schemas.
- ❖ Adaptable problem solver with strong teamwork, and quick learning abilities.
- ❖ Excellent knowledge of PHP programming language, including object-oriented programming concepts, data structures, and algorithms. Experience in writing clean, efficient, and maintainable PHP code.

Languages

- ❖ Arabic: native.
- ❖ English: good.
